Philips HD11 & HD15 Configuration

Last Modified on 05/04/2017 7:05 pm EDT

Add DICOM configuration to create two new Storage/Archive services:

a. DICOM Preset screen: Click **Preset rename, Create, Delete...**

b. DICOM Preset Controls screen:

    i. Type **TRICE MEDICAL** in the Create a New Preset box

    ii. Click **Create New**

    iii. Click **Close**

c. DICOM Setup screen:

    i. Confirm **TRICE MEDICAL** appears in the Change DICOM Preset box. If not, choose this option from the dropdown menu.

    ii. Click **Change Settings for Current Preset**

    iii. Click **Servers and Roles**

d. Servers and Roles screen:

    i. Under Servers, click **Modify**

        1. Type **TRICE MEDICAL** in the AE Title box

        2. Type **104** or **105** in the Port box (Click here for more information)

        3. Select IP Address under Host/IP Address

        4. Type the IP Address **x.x.x.x-archive** - refer to the computer running Uplink for the IP address

        5. Click **Done**

    ii. Under Roles, click **Modify**

        1. Under *Storage > Primary Storage SCP*, select **TRICE MEDICAL** in the drop-down menu

        2. Click **Advanced**

        3. On the Network Preferences tab:
-Select the **Image Format** tab
-Under *Color Images>Format*, select **RGB**
-Under B&W Images, select **Use MONOCHROME2 Format**
-Under Transfer Syntax, select **Uncompressed, Implicit VR Little Endian**
-Click **OK**

        4. Select **Done** and **Close** under the Roles section

        5. Click **Modify Current** when the DICOM Preset Settings Changed dialog box appears, followed by **OK**

Click Close, followed by **OK** to close the Setup screen. Repeat the above steps to create the second archive:

- In Step B, type **TRICE PATIENT** instead of TRICE MEDICAL
- In Step D, replace the "archive" in the IP address with "**patient**"

Click here for instructions on testing the configuration of your machine.

Note: *The machine cannot be in Exam Mode during configuration.*
