# Step 2: Configure your Voluson

After you activate your Tricefy account, it only takes a few seconds to setup your machine. You can automatically send data to Tricefy at the end of each exam (by pressing the **End Exam** button) and/or share exams with patients by pressing a P button.
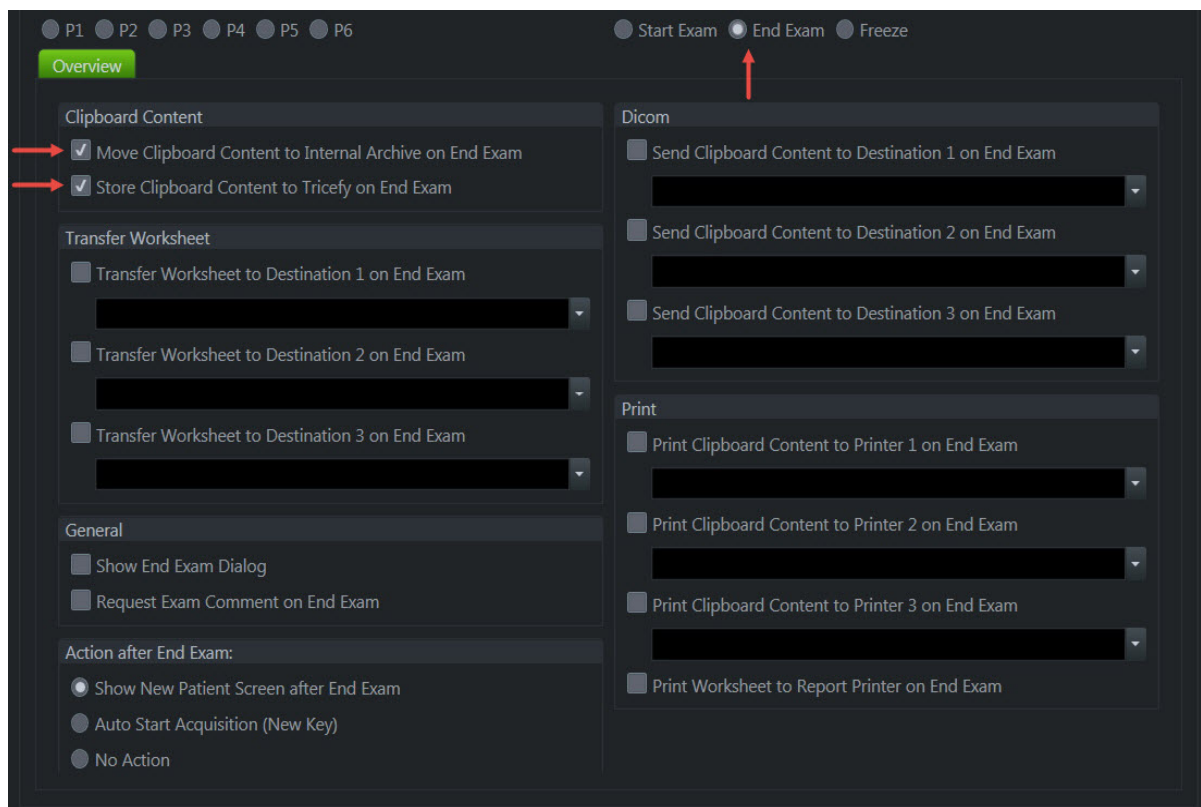

First, select the **Button Configuration** tab:

- For <u>archive-only</u> users, refer to the **Archiving** step immediately below

- For <u>patient-sharing only</u> users, refer to the **Patient Sharing** step

- Refer to both steps if using both the archiving and patient sharing features

Archive: Sending Data at the End of Exam

To send data when the exam has ended, select the **End Exam** option and make sure **Move Clipboard Content to Interval Archive** and **Store Clipboard Content to Tricefy** are selected in the Clipboard Content box.

Patient Sharing: Sending Data with a P Button

To send data by pressing a P button, select the P button you would like to use **P2**) and make sure **Save to Clipboard with P2** is selected in the General box. Select **Share Image/Cine with Patient with P2** in the Tricefy box.

If you have ultrasound systems that do not have Tricefy Inside but would like to connect them to Tricefy account, please refer to our standard Getting Started Guide for configuration steps.
