

Fixing Patient Data

Last Modified on 2022-04-04 13:55

Trice Imaging does not correct or delete data on behalf of clinics (we take data privacy very seriously). However, our interface makes data correction quick and easy.

 [Edit patient information, such as name and birth date, or delete patient information](#)

 [Correct a patient ID](#)

You can also correct data using your imaging system and resending the examination to Tricefy (if you do this, we suggest deleting the erroneous study).
