Watch our video: athenahealth with Tricefy Reporting

For Athena integrations to be configured in your Tricefy account, you must first authorize the Tricefy system to access your care center's Athena tablespace by filling out the form linked below

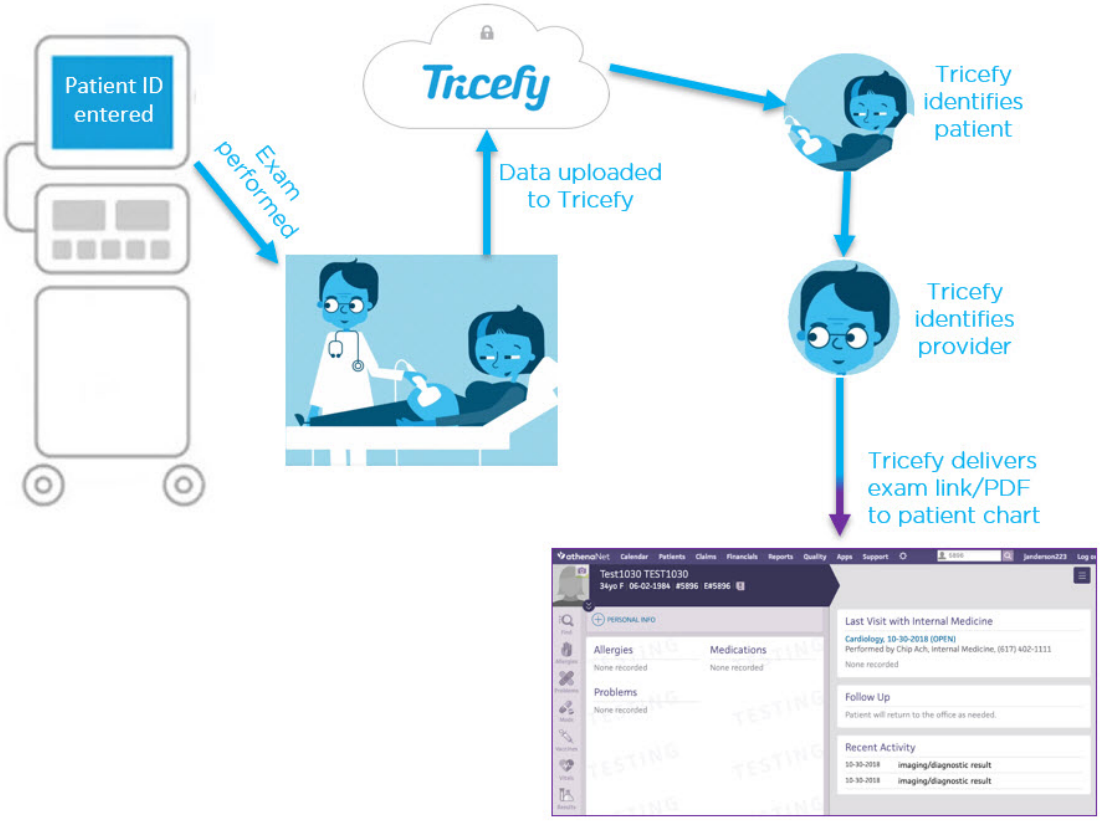

- **Athena authorize and consent form**

Tricefy can integrate with your athenahealth system in two different ways: modality worklist and imaging results document.

See the Tricefy Athena Integration Specification here

Sending imaging result links or PDFs to the patient chart

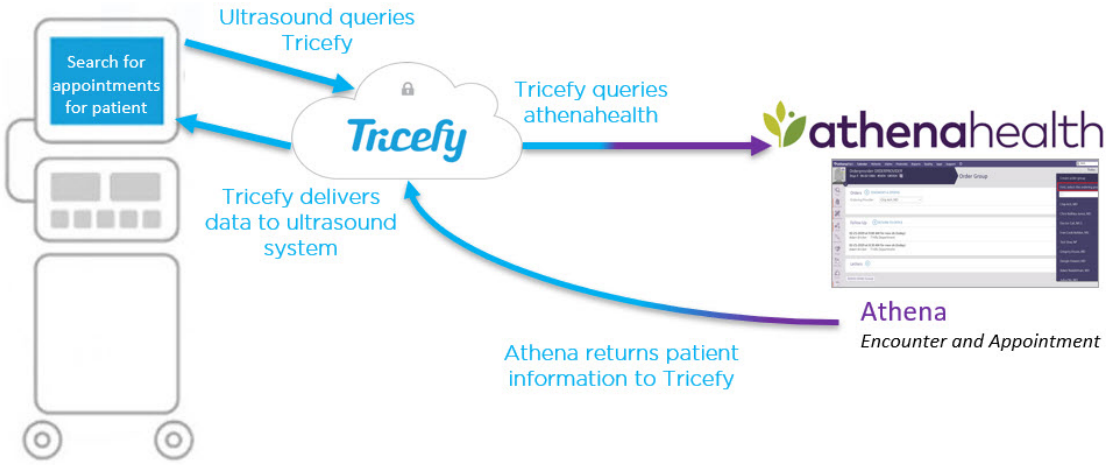

You can automatically send imaging result PDFs that are stored in Tricefy to the Athena patient chart:

Instructions for sending exam links to the patient chart

Worklist

You can automatically populate the many of the patient and exam fields in your ultrasound system by using Tricefy to obtain information from the Athena appointment. These fields include but are not limited to, the patient's name, birth date, sex, referring physician, and exam type.

Instructions for using Worklist
