

Mac OS Security Settings (Pre Uplink Installation)

Last Modified on 2024-06-07 11:49

New versions of Mac OS require an adjustment to the security settings before installing Uplink.

If this pertains to you, the following error will display when attempting to install Uplink:

To install Uplink,

- 1) Download Uplink as normal (https://downloads.tricefy.com/tricefy_uplink/uplink4.pkg)
- 2) Access your *System Settings*
- 3) Go to the *Privacy and Security* settings
- 4) Scroll to bottom and select *Open Anyway*
